To Whom It May Concern:

I am writing in reference to the services that have been provided to us by VR Metro. We are an outpatient behavioral health company that several years ago decided we should have a web page. With that thought in mind we had the good fortune of locating VR Metro. Due to the work we have done with them our web page had surpassed phone and phone book as our source of referrals.

Amongst the things I like about working with VR Metro is that they listen to what I am looking for and can translate that into a web page that serves our need. The staff are very available, will update as I request, and give suggestions on things I should consider without being pushy.

It is without hesitation that I recommend VR Metro to any business that needs web page support.

Sincerely,

Thomas Johnson, LMSW, ACSW, CHE
Chief Executive Officer
